SELECTED DATA PROJECTS

Wedding songs data viz for 2019 XDS Data Storytelling Challenge - Awarded a commendation for creativity and design. Used Spotify data to explore traits of popular wedding songs and visualized them as cupcakes.

Natural Language Processing with tweets to @AmazonHelp - Preprocessed customer support requests with SpaCY and performed Latent Dirichlet Allocation analysis, bi-term topic modeling, and non-negative matrix factorization. Uncovered core themes in users' expectations to serve as a guide for improving customer satisfaction.

EXPERIENCE

Maritime and Port Authority of Singapore
Senior Manager, Policy & Strategy

AUG 2017 - PRESENT

Delivered end-to-end data projects, including surveys/ interviews with industry stakeholders, on developments like regional competition to inform organizational strategy.

Led the research team and presented on global shipping trends in technology and other domains for a management retreat

Served as speechwriter to the Chief Executive for keynote events, where the organisation's priorities and plans are shared with industry guests and staff

Manager, International Relations

SEP 2015 - AUG 2017

Co-represented Singapore in international negotiations on shipping's greenhouse gas emissions. Analysed and managed policies on marine environment issues.
